To assure lasting life, functionality, and appearance, Land Rover Approved Accessories undergo extreme real-world testing to deliver maximum quality and meet Land Rover’s exacting standards.
CARRYING ACCESSORIES
– Real-world dynamic testing helps to ensure that the accessory performs with no detrimental effect to the vehicle.
– Specifically tested and approved on the particular vehicle, incorporating a range of challenging durability tests on both the vehicle and carrier, such as the Pavé Test.
– Pavé Testing involves driving the vehicle with a fully laden carrier for hundreds of miles over rough, uneven, and extremely bumpy surfaces to simulate a lifetime of use. One mile of Pavé is equivalent to 100 miles of real-world conditions.

EXTERIOR STYLING ACCESSORIES
Land Rover Exterior Styling Accessories are subjected to a range of stringent environmental tests to ensure they can withstand the toughest climatic conditions. Each accessory product undergoes a series of testing relevant to its design, materials, and function, which can include:

Extreme tests against aging prematurely or discoloration.
– Up to two years’ direct sunlight known as “Florida Weathering.”
– Heat Aging Test for 500 hours.
– Extreme Temperature Test ranging from -40°F to 176°F.

Extreme tests to ensure durability and longevity of the finish.
– Heat Shock Test, which consists of 16 hours at -40°F then 5 minutes at 158°F.
– Humidity Resistance Test, which is 168 hours at 118°F, with humidity ranging from 95%-100%.
– Accelerated Environmental Cycle Test, composed of a relentless barrage of salt, dirt, and dust, simulating a lifetime of real-world driving.

INTERIOR STYLING ACCESSORIES
Land Rover Interior Styling Accessories are subjected to a range of stringent tests to help ensure they can withstand the challenges of a lifetime of use. Each accessory product undergoes a series of testing relevant to its design, materials and function, which includes quality tests, durability tests, and extreme tests against premature aging or discoloration.

– Accelerated Environmental Tests, including a Heat Aging Test, for up to 500 hours.
– Performance Specification Tests to ensure quality standards and durability are in line with Land Rover Standards.
– Squeak and Rattle Tests to ensure no detrimental effect to vehicle quality and comfort levels.

TOWING ACCESSORIES
– Towing systems are tested well beyond recognized industry standards to ensure they achieve the position of “best in class.”
– While many aftermarket towing solutions are typically developed off-vehicle using rig-based tests, all Land Rover towing systems are tested while mounted to a vehicle body. This helps to ensure that the tow system and vehicle are optimized to work together.
– Towing systems are subjected to challenging Real World Driving Simulations to help ensure that, even in an emergency situation, both the vehicle body and the towing system are able to cope with the pressures applied from a fully laden trailer.
– Towing systems are designed alongside the core vehicle and feature consistent exterior trim parts for a seamless and integrated look.

WARRANTY
Every Land Rover Approved Accessory includes a warranty that begins on the date of purchase of the accessory and is covered for 12 months (unlimited mileage) or the balance of the new vehicle/emissions warranty, whichever is greater. See your Land Rover Retailer for details.

All Land Rover Approved Accessories are manufactured using materials that meet automotive industry flammability standards and are compliant with all relevant legislative requirements.

1. This vehicle comes with a special 3-year limited warranty for manufacturer defects if purchased at time of vehicle sale. If purchased post vehicle sale, warranty coverage is for a finite period of 12 months, regardless of vehicle mileage.

2. Unique security coding process is required. See your sales consultant for special ordering details.

3. Roof Rails and Cross Bars are required for all Land Rover roof-mounted accessories. Objects placed above the roof-mounted satellite antenna may reduce the quality of the signal received by the vehicle and could have a detrimental effect on the navigation and satellite radio system, if fitted.

Vehicles with an opening roof: Some roof-carrying accessories may restrict opening of the vehicle’s sliding sunroof when fitted. Care should be taken when opening the roof to avoid collision with any items fitted above the vehicle.

Genuine Land Rover Accessories Assure Confidence

Land Rover would like to remind you that accessories that are non-genuine Land Rover are not warrantied by Land Rover North America and may not be serviceable at other Land Rover Retailers. If your Land Rover Retailer or sales guide offers you non-genuine Land Rover parts or accessories, we recommend finding out whether they have a warranty, where they can be serviced, and what company provides these warranties and service.

All our accessories are designed to be an integral part of Land Rover vehicles. While many items such as roof carriers are simple to fit, some products require specialty tools and diagnostic equipment to ensure correct integration with the vehicle structure and electrical systems. Although Land Rover takes the utmost care in ensuring that all details in the publication are correct at the time of going to press, we are constantly striving for improvement and therefore reserve the right to alter specifications and equipment without notice. Details of specifications and equipment are also subject to change to suit local market conditions and requirements, and not all products are available in every market. Some vehicles are shown with accessories or optional equipment fitted. These products vary from market to market. Please consult your Land Rover Retailer who will be pleased to advise you on current specifications. Distributors and Retailers are not agents of Land Rover and have absolutely no authority to bind Land Rover to any express or implied undertaking or representation.
